

# Hitachi Vantara Certified Professional Program

## Enhance and Validate Your Storage Skills

The Hitachi Vantara Certified Professional program is an industry- leading, role-based, certification program. It provides knowledge and skills validation through a variety of exams in the areas of storage solutions architecture, implementation and administration, using Hitachi Vantara hardware, software, solutions, services and technology.

### Benefits

With the Hitachi Vantara Certified Professional program, individuals:

- Validate their skills, knowledge and technical competencies.
- Establish their credibility and increase their value in the IT marketplace.
- Gain peer recognition and distinguish themselves from the competition.

### Credential Levels

The Hitachi Vantara Certified Professional program features a two- tier assessment structure that provides an evolution path as professionals increase their expertise and advance their careers.

**Qualification-level** testing leverages low stakes exams typically used for validation of broad and general expertise on subjects that evolve rapidly and for validation of basic and fundamental technical knowledge acquired academically.

In most cases, passing a qualification test leads to a qualification credential. Passing a test can also be a requirement for a certification credential. Hitachi Vantara currently offers two qualification levels: Associate and Professional.

**Certification-level** testing effectively and accurately validates that candidates have the skills, knowledge and abilities to perform specifically identified tasks as they relate to real-life job situations.

In order to pass certification exams, candidates are expected to use knowledge acquired through multiple means and real-life experiences, including various formal and informal training and learning methods.

In most cases, passing a certification exam leads to a certification credential. Alternatively, multiple exams may be required to obtain a certification credential. Two certification levels are currently available: Specialist and Expert.

### Certification Qualification

Track Name	Credential	Edge-to-Core-to-Cloud Infrastructure					Intelligent Data Operations	
		Storage		Data Protection		Converged	Modern Object Store	Business Analytics
Sales	Professional	Solution Selling HQT-1023						
Technical Presales (Partners)	Professional	Edge-to-Core-to-Cloud Infrastructure Foundation HQT-2123						Intelligent Data Operations Foundation HQT-2923
Technical Presales (Employees)	Professional	Presales Solution Positioning HQT-2002						
Administration	Professional	Hitachi Ops Center Administration HQT-6741	Hitachi Ops Center Automation HQT-6761	Hitachi Ops Center Protection HQT-6711	In-System Replication Management HQT-6713		Content Platform Administration HQT-6420	
		Hitachi Ops Center Analyzer Management HQT-6771	Storage Performance Analysis with Ops Center Analyzer HQT-6701	Global-Active Device Management and Operations HQT-6712	Universal Replicator Management HQT-6714		Content Platform for Cloud Scale Administration HQT-6430	
		NAS Administration HQT-6200
