Top 5 Reasons Why Customers Choose Hitachi Vantara for SAP Modernization

Businesses depend on SAP HANA

Businesses depend on SAP HANA to power large-scale data applications, ensuring a sustainable competitive advantage. Next-generation SAP technologies provide the agility, flexibility, and scalability needed to support transactional applications and empower developers to drive innovation, including generative AI. Despite the demand for rapid and adaptable application deployment, IT organizations face significant challenges in maintaining existing IT infrastructure. The concept of data resiliency now encompasses disaster recovery, business continuity, protection against security threats, and the need for data portability to optimize execution venues based on business needs.

Agility

Flexibility

Scalability

Moreover, as businesses gear up to meet SAP's 2027 deadline to migrate workloads to SAP HANA and SAP S/4HANA, they expect enterprise-grade IT infrastructure to power SAP HANA. Hitachi Vantara offers a comprehensive suite of SAP infrastructure and services, essential for integrating business processes and delivering substantial value through the SAP ERP application and SAP HANA portfolio.

Why Hitachi Vantara could be the right partner on your journey toward SAP modernization

Leading companies are determined to fully leverage the SAP ERP application and SAP HANA portfolio, utilizing advanced ERP modernization expertise and comprehensive as-a-service offerings. Visionary enterprises are decisively selecting Hitachi Vantara to modernize their SAP ERP and database infrastructure, employing world class storage and integrated solutions.

Hitachi Vantara's Unified Compute Platform is a fully appliance and TDI certified for SAP HANA solution, offering certified infrastructure and modernization services, ensuring performance and reliability on various Virtual Storage Platforms with Solid State Drives and Storage Virtualization. As a proven-leader in achieving measurable outcomes, below are some reasons why Hitachi Vantara could be the right partner on your journey toward SAP modernization.

¹ SAP Standard Application Benchmarks

Operation Resource Manageability

View and analyze end-to-end topology from virtual machines and server to shared storage for inter-dependencies, root-cause analysis, and faster remediation. Predictive analytics for future resource and capacity requirements. Identify anomalies and ensure service-level objectives for performance and capacity.

Reduce Costs and Simplify SAP Environment

Disjointed processes and complex, multi-vendor solution can impede innovation. Simplify and consolidate multiple isolated SAP by consolidating multiple product categories and regions into a scalable powerful compute and storage infrastructure streamlining server and storage management to significantly lowers costs of SAP operations. Modular scale to flexibly grow at the pace of business.

Redefine Resiliency

Trusted by customers globally with their SAP applications and data, Hitachi's solutions enable non-stop innovation everywhere. Only CFP-certified storage, VSP One is the industry benchmark for lower carbon footprint. Hitachi Vantara offers a comprehensive range of workload recovery solutions for critical SAP applications, ensuring minimal downtime for SAP HANA storage systems with a 100% data availability guarantee.

Customer Transformation Stories

Infosys

Infosys Supercharges Application Performance with Hitachi Storage and Integrated Infrastructure.

“

The Hitachi VSP 5600 is running our applications at least 10 times faster than our SLA requires, and 70% to 90% faster than our previous-generation storage. That means our microservices can communicate almost instantaneously, so we can provide a seamless user experience for our employees.”

Vadiraj Adiga
Associate Vice President
Enterprise Platform Management, InfoSys

SFS Group

Faster time to market with proactive monitoring and reporting with a high-touch customer experience that you deserve and expect in your journey to SAP S/4HANA.

“

Our single-vendor data center strategy with Hitachi Vantara has helped our IT team become an internal innovation partner for our business departments. Thanks to fast and efficient Hitachi Vantara solutions, we can deliver next-generation IT applications and facilitate business transformation.”

Urs Lüchinger

Head of IT Infrastructure Backend, SFS Group

Suva

Innovate 24*7 with SAP services with a worry-free SAP-certified IT infrastructure hosted on-premise or in the public cloud.

“

Hitachi Vantara has become a trusted partner, delivering outstanding quality, stability, services as well as performance throughout our 30-year relationship. They continue to invest in innovations, products, and usability, and we truly appreciate all the improvements we see in the latest Hitachi Virtual Storage Platform 5500.”

Christian Arn

Head of IT Infrastructure, Suva

s.r.o.

Enhance the value of your SAP HANA investment and ensure instant data access for quicker decision-making.

“

While an update of budgetary data used to take 2-3 hours, with UCP for SAP HANA it now takes 3-4 seconds. Processing a 400,000 line bank account statement used to take 30-40 minutes; today, it takes just 10% of this time.”

Vitezslav Duspiva

Client Manager, Atos IT Solutions and Services, s.r.o.

itelligence Nordic

Hitachi Vantara Solutions delivers intelligent, adaptable SAP HANA storage that scales effortlessly and cost-effectively, addressing dynamic data requirements and supporting any SAP application seamlessly.

“

Thanks to the flexibility of the UCP solution, we can deliver exactly what our clients want, increase satisfaction and keep ahead of the competition.”

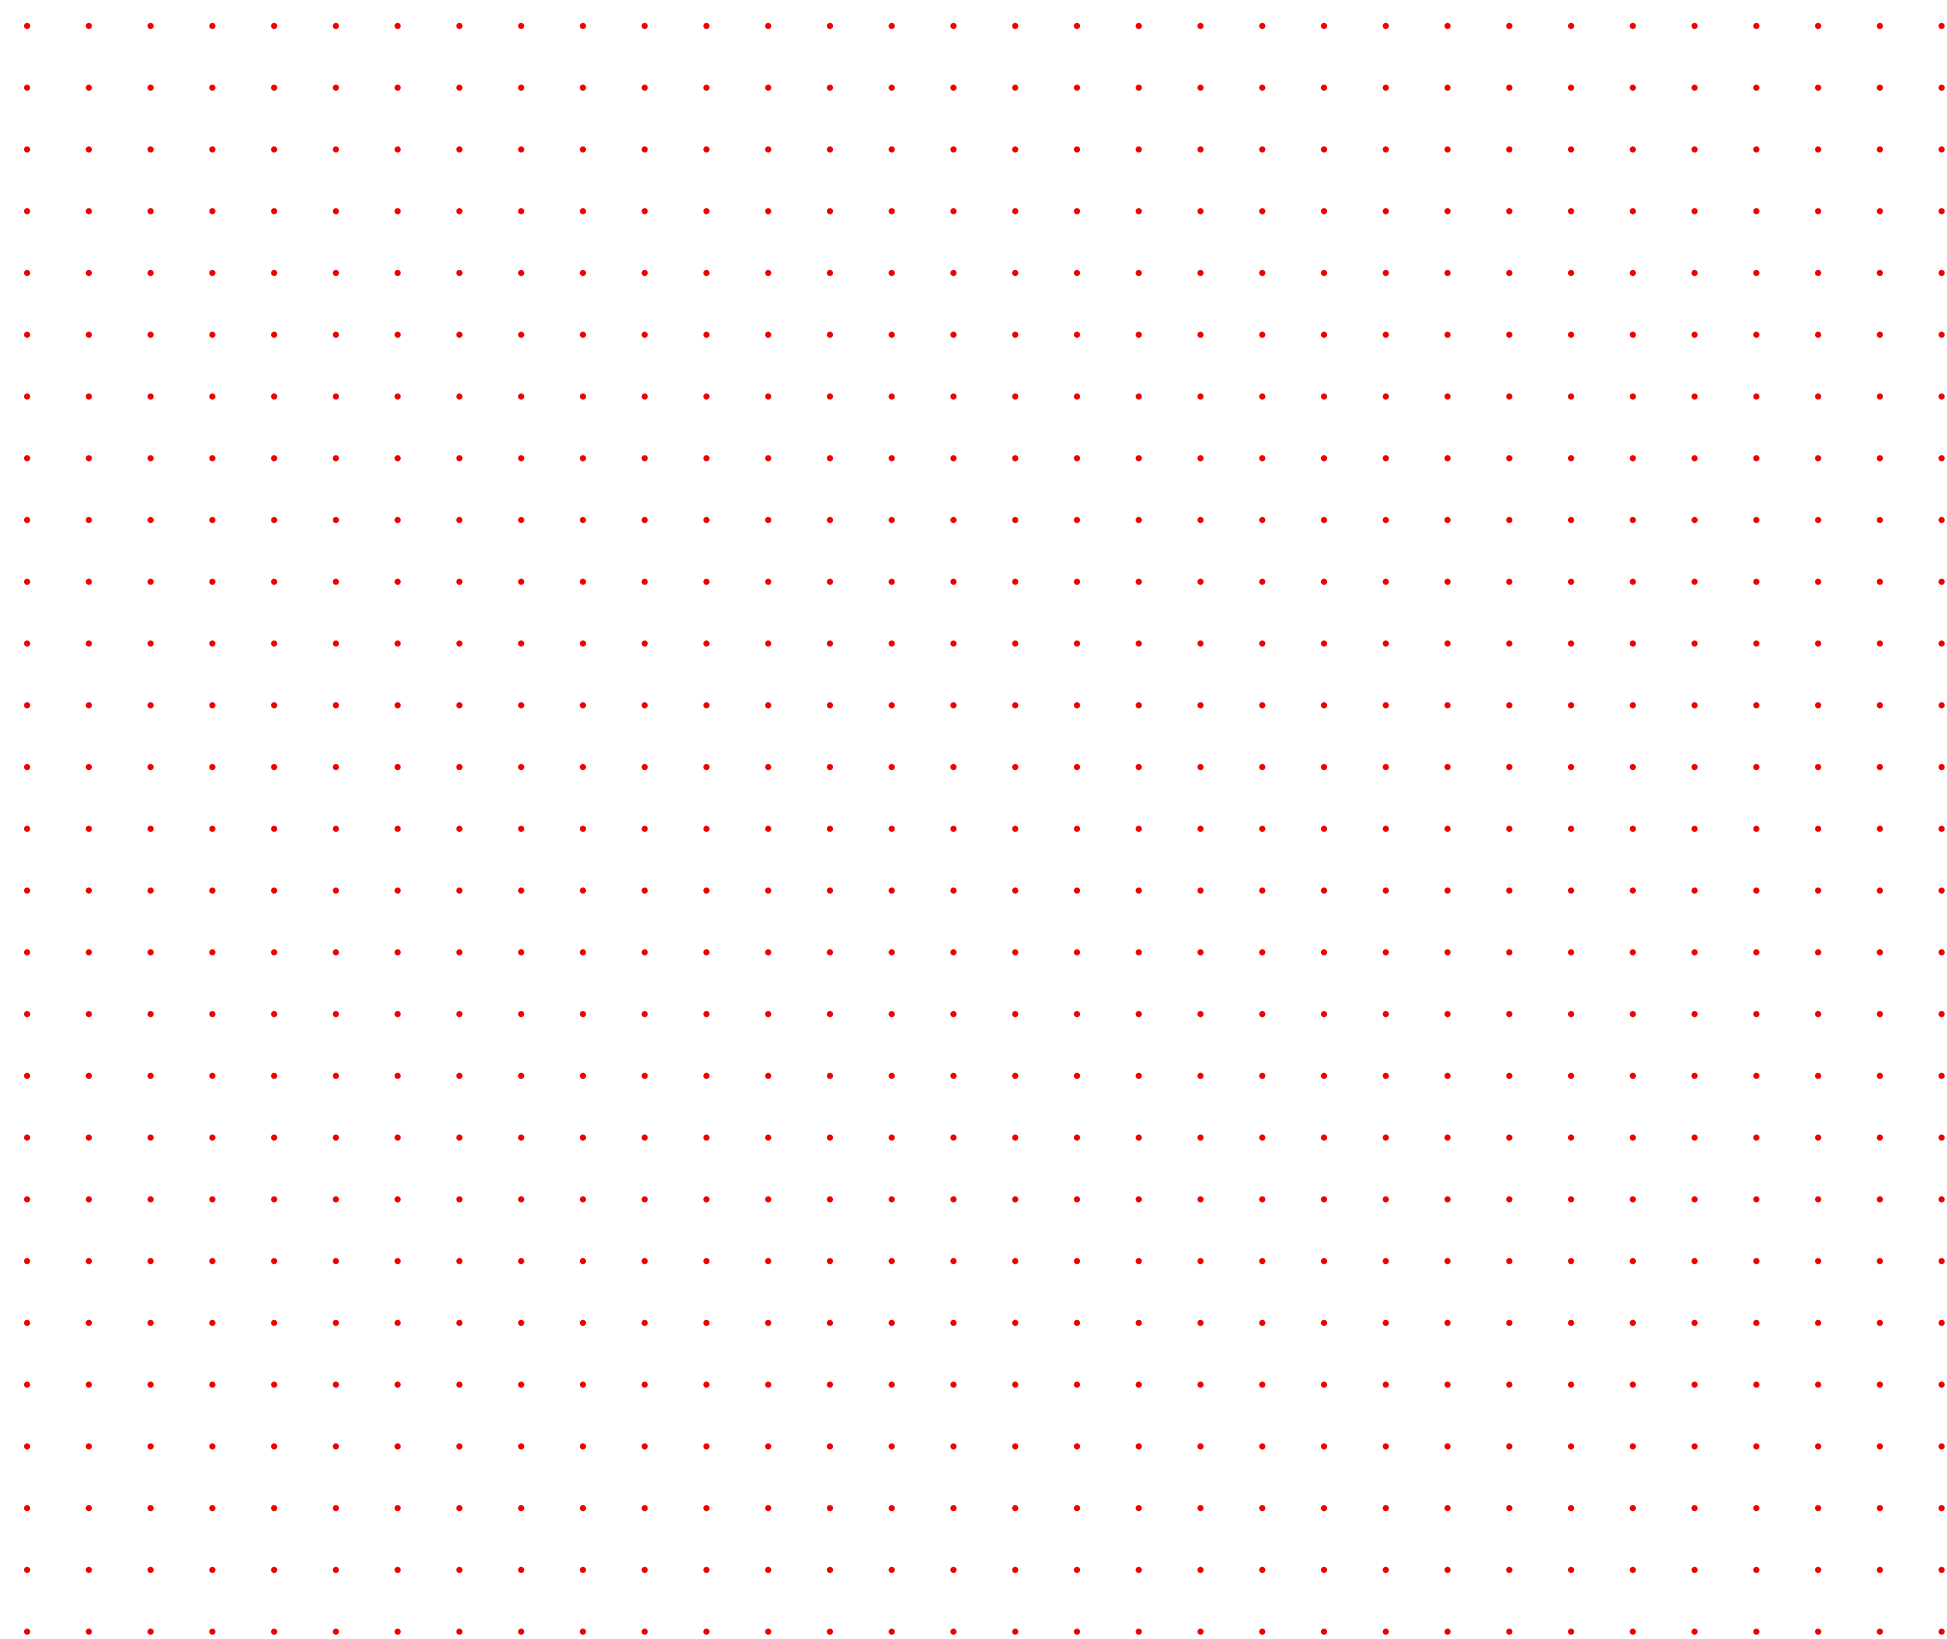

Dannie Havgaard

Sales Manager for Managed Services
itelligence Nordic

Conclusion

Maximize your return on SAP HANA with a modernize IT infrastructure delivering rapid insights, reduce costs, and redefine resilience to drive innovation and stay competitive. Transform your SAP landscape seamlessly with Hitachi Vantara's comprehensive with SAP HANA TDI certified solutions combined with global support, and services. Simplify SAP HANA integration and elevate productivity with Hitachi's streamlined server and storage management across multiple product categories and regions.

Maximize your return on SAP HANA today
