

Solution Profile

Hitachi EverFlex Bare Metal as a Service (BMaaS)

*Accelerate processing
power with greater
security and control*

Gain the performance and cost benefits you're looking for with a Hitachi EverFlex server solution that provides unparalleled flexibility and control.

Virtualization Performance Challenges

Virtualized environments struggle to handle high-performance workloads due to shared resources and potential security vulnerabilities. Businesses need dedicated infrastructure to achieve optimal performance and security without the overhead of managing physical servers.

Hitachi EverFlex Bare Metal as a Service (BMaaS)

Dedicated Compute Resources that Scale

Hitachi EverFlex Bare Metal as a Service (BMaaS) offers a high-performance, dedicated server solution that provides unparalleled flexibility and control. Unlike traditional cloud services, BMaaS delivers dedicated physical servers on demand, ensuring optimal performance for critical workloads.

Simplified Management

EverFlex BMaaS provides dedicated physical servers that can be customized to meet specific workload requirements. This service integrates seamlessly with existing IT infrastructure and offers scalability to accommodate growing business needs. By leveraging BMaaS, businesses can enjoy the benefits of dedicated hardware without the complexities of physical server management.

Optimized Infrastructure with EverFlex

Adopting EverFlex BMaaS allows businesses to optimize their infrastructure management and enhance operational efficiency. With its superior performance, enhanced security, and cost-effective scalability, BMaaS is an ideal solution for businesses requiring high performance and control.

Operational Gains

- **Performance:** Dedicated resources ensure superior performance, ideal for high-compute and low-latency applications.
- **Security:** Isolated physical servers enhance security, reducing the risk of multi-tenant vulnerabilities.
- **Control:** Full control over the server environment, including the operating system and software stack.
- **Cost Efficiency:** A pay-as-you-go model eliminates the need for upfront capital expenditure on hardware.
- **Scalability:** Easily scalable to meet growing business demands without the complexity of managing physical hardware.
